Senior Full-Stack Developer | Python, FastAPI & Generative AI Engineering | PHP/Laravel

PROFESSIONAL SUMMARY

Full-stack developer with 8+ years building production systems in PHP/Laravel and Python, with hands-on delivery of Generative AI features — LLM integration, RAG pipelines, and AI agents — using FastAPI, LangChain, LangGraph, OpenAI, Google Gemini, and Groq. Shipped AI-powered auto-grading and content-recommendation features for a 10,000+ user EdTech LMS, architected RESTful APIs and MySQL systems across EdTech, Healthcare, and Fintech, and independently built and deployed FastAPI + RAG/LangGraph applications end-to-end — API design, vector retrieval, authentication, and caching. Mentors developers and owns GenAI features from prototype to production in Agile teams of up to 15.

CORE SKILLS

Python & GenAI/LLM Engineering: Python (FastAPI, Flask), LangChain, LangGraph, RAG (Retrieval-Augmented Generation), Prompt Engineering, AI Agents, OpenAI API, Claude/Anthropic API, Google Gemini, Groq API, Ollama, Streamlit, Pydantic

Back-End & APIs: PHP (Laravel, Symfony, Zend, CodeIgniter, Core), Golang, RESTful API Design, OAuth, WebSockets, RabbitMQ

Databases: MySQL (Schema Design, Indexing, Query Optimization, Triggers), PostgreSQL, Redis

Front-End: HTML, CSS, JavaScript (ES6+), Bootstrap, Tailwind CSS, React.js (Hooks, Context API)

Cloud & DevOps: AWS (EC2, S3), Docker, Git, GitHub, GitHub Actions (CI/CD)

Testing & Tooling: PHPUnit, TestClient, Postman, JIRA, GTM, GA4, New Relic, Agile/Scrum

AI-Assisted Development: GitHub Copilot, Claude, ChatGPT (AI-assisted coding, debugging, and code review)

WORK EXPERIENCE

Senior Software Developer – Full Stack & AI Integration

Dec 2023 – Feb 2025

Intellinez Systems, Ajit Singh Nagar, Punjab | Team Size: 10 | Laravel, React.js, Python (Flask), AI/OpenAI API, Zoom API, MySQL, New Relic

- Designed and shipped 15+ custom REST endpoints integrating OpenAI-based AI APIs and Zoom, powering auto-grading and content-recommendation features for MeraTutor, an AI-powered LMS supporting 10,000+ concurrent users, with zero-downtime releases.
- Owned end-to-end architecture and delivery of MeraTutor, coordinating Laravel/React core services with Python (Flask) components supporting AI feature rollout.
- Led MySQL schema redesign and query optimization initiative, reducing average page load time by 35%.
- Drove Agile ceremonies (sprint planning, retrospectives) using JIRA and Git, improving sprint completion rate to 90%+.
- Monitored application performance and proactively diagnosed production issues using New Relic, improving incident response time and platform reliability.
- Used AI-assisted development tools (GitHub Copilot, Claude, ChatGPT) to accelerate coding and debugging, applying manual review and testing to validate all AI-generated output before merge.

Full Stack Developer – Payments & Analytics

Sep 2022 – Jun 2023

Bridge Talent LLC, Pune, Maharashtra | Team Size: 15 | PHP (Laravel, Smarty), Golang, JavaScript, MySQL, REST, GA4

- Built and shipped 10+ RESTful APIs powering core product features, supporting integrations with 3 third-party platforms.
- Integrated Braintree payment gateway, processing secure transactions for the platform's checkout flow with zero PCI compliance issues.
- Implemented Google Tag Manager (GTM) and GA4 tracking, enabling data-driven product decisions across the team.
- Optimized high-traffic database queries, reducing average query execution time by 25%.

Full Stack Developer

May 2022 – Aug 2022

Thinkbridge Software Pvt Ltd, Pune, Maharashtra | Team Size: 10 | PHP (Laravel, Smarty), MySQL, AWS, React, Periscope Data, JIRA

- Built and maintained client-facing web applications using PHP Core and Smarty, supporting AWS-hosted deployments.
- Wrote unit and integration test suites that increased code coverage and reduced production defects.

- Participated in peer code reviews, enforcing coding standards across a 10-person engineering team.

Senior Software Developer – Backend Architecture

Sep 2021 – Apr 2022

Optimal Virtual Employee | Team Size: 7 | PHP (Laravel, Symfony, CodeIgniter), MySQL (Triggers, Optimization), REST, OOP

- Engineered the Laravel backend for a real-time temperature tracking system processing IoT sensor data.
- Applied OOP design patterns and REST API best practices, reducing code duplication by 20% across modules.
- Integrated and maintained 4+ third-party API services supporting core system functionality.

Senior Software Developer – Therapeutic Guidelines Platform

May 2019 – Dec 2021

MPS Ltd, Gurugram | Team Size: 4 | PHP (Laravel), WordPress, MySQL, RESTful APIs, RBAC

- Implemented role-based access control (RBAC) across 5 roles, securing system access for 1,000+ users.
- Built and maintained core backend systems for Therapeutic Guidelines (tg.org.au), a subscription-based clinical reference platform used by healthcare professionals.
- Optimized database queries and implemented Redis caching, improving backend response times by 30%.
- Built and integrated a coupon system into the checkout flow, and managed admin billing and CMS integration supporting day-to-day operations.
- Monitored production environments and diagnosed and resolved issues to maintain platform stability and uptime.

Software Engineer (PHP)

May 2015 – May 2019

Coronet Software Pvt. Ltd, Gurugram | Team Size: 4 | PHP Core, MySQL, CMS, HTML, CSS, JavaScript, jQuery, PDO

- Developed responsive UIs with HTML, CSS, and jQuery integrated with PHP back-end systems for enterprise clients.
- Built and maintained backend systems for clients including IDP, LG, and Wolters Kluwer.
- Maintained legacy systems and optimized CI/deployment pipelines, reducing release cycle time.

KEY PROJECTS

Generative AI & Python Projects

LangChain RAG Document Q&A Chatbot

- Built an AI-powered Document Question-Answering chatbot using Retrieval-Augmented Generation (RAG) with LangChain, enabling users to upload PDF documents and ask natural-language questions.
- Implemented document chunking, embedding, and vector-based retrieval to surface the most relevant context from uploaded PDFs before generation.
- Integrated Google Gemini as the generation model, producing accurate, context-grounded answers directly from source documents.

LangGraph Streamlit Chatbot with Groq LLM

- Built a conversational AI chatbot using LangGraph, LangChain, Groq LLM, and Streamlit, delivering a simple web-based chat interface.
- Implemented stateful, multi-turn conversations using LangGraph memory, with Pydantic validation and python-dotenv for secure Groq API configuration.

Blog API – FastAPI Backend with Auth and File Uploads

- Built a RESTful Blog API with FastAPI and PostgreSQL, implementing full CRUD operations, Pydantic-based validation, and secure authentication for posts and comments.
- Added file upload support for post attachments, with a modular project structure for clean, maintainable data handling.

URL Shortener Service – FastAPI & Redis

- Developed a URL shortening service using FastAPI and PostgreSQL, converting long URLs into short, shareable links with configurable expiration times.
- Used Redis to cache URL mappings and implemented CORS, dependency injection, and environment-based configuration for secure, scalable deployment.

Full-Stack Platform Projects

MeraTutor – AI-Powered Learning Management System

- Architected core LMS modules in Laravel and React serving 10,000+ active learners; led a 3-engineer sub-team.
- Built custom REST endpoints integrating Zoom API (live classes) and OpenAI-based AI APIs (auto-grading, content recommendations), reducing manual grading effort by ~40%.

- Redesigned MySQL schema and added composite indexing, cutting average query response time by 35%.

Therapeutic Guidelines Platform (MPS Ltd)

- Engineered core backend systems for Therapeutic Guidelines (tg.org.au), a subscription-based clinical reference platform used by healthcare professionals.
- Implemented role-based access control (RBAC) across 5 user roles, eliminating unauthorized access incidents.
- Introduced a Redis caching layer, improving backend response times by 30%.
- Built and integrated a coupon system into the checkout flow, and diagnosed and resolved production issues to maintain platform stability for end users.

EDUCATION

B.Tech. in Computer Science & Engineering

June 2011 – July 2014

Rayat-Bahra Institute of Engineering & Nano-Technology, Hoshiarpur, Punjab

CERTIFICATIONS

- Anthropic Claude AI Developer Certification
- AWS Certified Developer - Associate (In Progress)
